

Organic/Sustainable Producers Nutrient Management Meeting

When: February 9, 2012

Speaker: Kevin Shelley
UWEX Nutrient & Pest Specialist

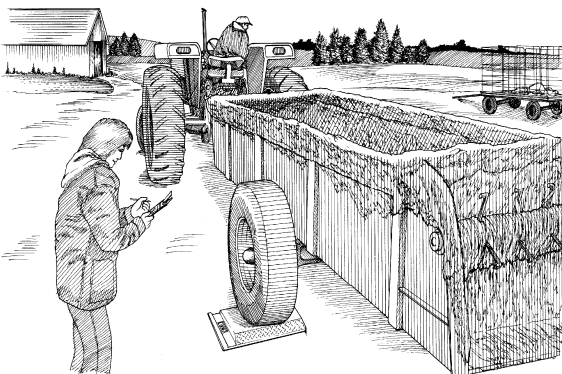

Time: 1pm – 3:30 pm

There is no fee for this program.

Location: Administration Building, Juneau
(Same building as UW-Extension and Land Conservation)

Learn how to:

- Meet crop nutrient needs with organic sources such as manures, composted organic materials, legume crops and cover crops.
- Use soil test analysis to make manure and other nutrient recommendations.
- Use crop rotation and crop diversity along with organic nutrient sources in long-term soil building.
- Keep compliant with the Farmland Preservation Program

A NUTRIENT MANAGEMENT PLAN IS A TOOL FARMERS CAN USE TO JUSTIFY FERTILIZER INPUTS, AND HELP REDUCE THE CHANCE OF NUTRIENT LOSSES TO THE ENVIRONMENT.
