

The Dodge County Sheriff's Department needs your help. Several weeks ago the department arrested and charged an individual with multiple trailer thefts. The subject would scout potential targets, take photos, find a buyer on Craigslist, then return and steal the trailer. Often, he would scratch or remove identification numbers. Authorities have recovered a couple of pontoon boat trailers he stole and sold. Currently, based upon evidence the department has, it is believed several other stolen trailer cases may be tied to this man. The department is seeking those who may have innocently purchased a stolen trailer. To retain a stolen trailer may subject the owner to criminal charges so it is best if you call authorities if you feel you may have purchased a stolen trailer. Those in possession of a stolen trailer may be eligible to receive restitution for the amount paid for the trailer.

We are also seeking information from those who view the photos if they recognize the area, property or anything in the background which may assist authorities with piecing these thefts together. Specific photos are related to the following thefts:
